## FORMALDEGONE

For Professional Embalming Use Only.  
Before using, read Material Safety Data Sheet.

Prep Room Spray

Size

16 oz. Bottle

Item Number

550001

## DESCRIPTION

Formaldegone is a crystal clear liquid supplied in a sixteen ounce bottle with plastic trigger sprayer. It contains no chemicals which are deemed to be dangerous in use. When sprayed into the air, Formaldegone has no odor of its own.

Formaldegone has been field tested by Dodge's extensive testing committee made up of embalmers across the country. Virtually all of the numerous reports received raved about this material's immediate and complete effectiveness in subduing formaldehyde odors.

## FEATURES

The primary feature of Formaldegone is that it is completely effective in absorbing formaldehyde gas in the air. Since it has no odor of its own, there is naturally no masking affect. Formaldegone combines chemically with formaldehyde to remove it from the environment.

## APPLICATIONS

Spray Formaldegone any time formaldehyde gas is detected by its odor or its burning effect on the eyes. Although the product will be immediately effective, it may need to be reused after a period of time if a source of formaldehyde gas continues to generate vapors.

## A NOTE ON FLOORS

Please be aware that repeated spraying can cause some floors to become slippery or tacky. Be cautious walking in areas where the product has been used. Any undesirable film can quickly and easily be wiped up with a damp paper towel.
